

Icons of Christianity

The purpose of Sacred Art is to take you to the experience of timeless eternal Being, to the presence of the Divine, your deepest Self, where you are one with all. This is also meditation. We shall see how the icons achieve this and the great symbolism and knowledge contained in them. We shall then have some fun with some Russian icons. If we are lucky, we may visit the Greek Orthodox Church in Campbell's Creek with its amazing and relatively unknown history to see its icons!

Sunday 14 April 2019

Islamic Design

We shall explore the abstract designs of Islam, composed with just a compass and straight line based on the principles of sacred geometry. Whether in tiles, a grille, an arabesque, an illumination or an entire building, Islam has maintained the integrity of its philosophical vision of unity in diversity and the sense of the infinite. This vision confirms it as sacred art. We shall learn to create some of the designs and illuminate them.

Illuminated Manuscripts

We shall concentrate on the Insular or Celtic illuminated manuscripts from the 5th to the 9th centuries with their distinctive elements of plaited knots, dots, wheels and fantastic animal forms and exquisite calligraphy. Swamini will explain the symbolism and reveal its contemplative nature. Then we will create the most beautiful Celtic illuminations.
